ul#dropdown-menu li a{ display: block; padding:10px 20px; color:#fff; font-size:15px;
text-transform:uppercase; color:#CCCCCC; }
ul#dropdown-menu li.last > a{ padding-right:0; }
ul#dropdown-menu li.hover, ul.dropdown-menu li: hover{ position: relative;
text-decoration:none; }
/* LEVEL 1 menu item styling ON HOVER */
ul#dropdown-menu li.hover a{ text-decoration:none; color:#FFFFFF; }
/* styling of LEVEL 1 menu item that is current */
ul#dropdown-menu li.current > a{ color:#fff; padding:10px 20px; }

/* level 2 menu */
ul#dropdown-menu ul{ width:170px; position:absolute; top:100%; left:0; margin:0;
list-style:none; display:none; background-color:#232323; border:1px solid #333;
z-index:15; padding:5px 0; }
ul#dropdown-menu ul li{ width:140px; padding:0 15px; }
/* LEVEL 2 menu element styling */
ul#dropdown-menu li .sub-menu li > a{ width:140px; display:inline-block; color:#999999;
border:none; border-bottom:1px solid #f0f0f0; padding:10px 0; }

/* LEVEL 2 menu item styling ON HOVER */
ul#dropdown-menu li .sub-menu li > a: hover{ text-decoration:none; color:#fff; }

/* LAST LEVEL 2 menu item styling */
ul#dropdown-menu li .sub-menu li: last-child > a{ border:none; }
ul#dropdown-menu li .sub-menu li: last-child > a: hover{ border:none; }
```

3.Butoane

codul HTML :

```
<a href="http://www.facebook.com/Cadenzza.magazin">  
  
</a>
```

```
<a href="#">
```

```
  
</a>
```

4.Slider

codul HTML :

```
<div class="flexslider">  
<ul class="slides">  
<li>  
  
</li>  
<li>  
  
</li>  
<li>  
  
</li>  
</ul><!-- end .slides -->  
</div><!-- end .flexslider -->
```

codul css :

se alfa project candezza_layout\js\flexslider\flexslider.css

se alfa project candezza_layout\js\flexslider\jquery.flexslider.min.js

initializarea codului javascript/jquery se face din project candezza_layout\js\scripts.js

```
$('.flexslider').flexslider({  
  animation: "fade",      //String: Select your animation type, "fade" or "slide"  
  slideshow: true,        //Boolean: Animate slider automatically  
  slideshowSpeed: 7000,  
  // Primary Controls  
  controlNav: true,       //Boolean: Create navigation for paging control of each clide?  
  directionNav: false  
});
```

5. Subsol

Codul HTML :

```
<p class="text-center">cad<span>e</span>nzza | Magazin de Fabrica</p>
```

Codul Css:

```
.text-center{ text-align:center; }
```

Alte elemente ale pagini web :

1. Fiecare pagina web are un coment type : <!DOCTYPE>

2.Codul html trebuie scris in interiorul tagului <html>

3. In interiorul pagini putem avea head si body

4. in head avem:

- titlul paginii :

```
<title>Home :: Ingenious Solution</title>
```

- conexiunile la paginile exterioare :

```
<!-- /// Favicon ////////// -->
```

```
<link rel="shortcut icon" href="favicon.ico" />
```

```
<!-- /// CSS Stylesheets ////////// -->
```

```
<link href="style.css" rel="stylesheet" media="all" />
```

```
<!-- /// jQuery ////////// -->
```

```
<script src="_layout/js/jquery-1.8.0.min.js" ></script>
```

- metataguri pentru optimizare seo, etc.

```
<meta name="description" content=" add description ... " />
```

```
<meta name="keywords" content=" add keywords ... " />
```

Javascript

```
<!DOCTYPE html>
<html>
<body>

<h1>JavaScript</h1>

<p>Click Date to display current day, date, and time.</p>

<button type="button" onclick="myFunction()">Date</button>

<p id="demo"></p>

<script>
function myFunction() {
    document.getElementById("demo").innerHTML = Date();
}
</script>

</body>
</html>
```
